

# E300 Shower Stretcher

*E300A and E300B are excellent aids when showering patients.*

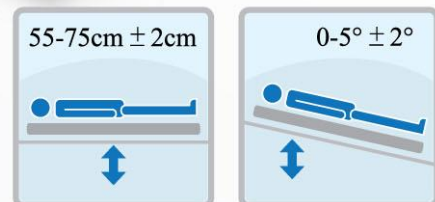

*It enables the nursing staffs to transport patients from bed to shower and back again easily to reduce the risk of back injuries. The stretchers can be accessed and adjusted from either side at a comfortable working height.*

## E300A Hydraulic

### Standard Features

- Integrated compartment base made with ABS
- Main frame made with anti-rust epoxy powder coated stainless steel
- Hydraulic cylinder controlled ascending and descending with foot pedals on both sides
- With flip-down siderails for easy patient transfer for shower
- Pillow x 1
- Drainage bag clasp is integrated at siderail on foot end
- Allows reversed Trendelenburg position to dry the bath mattress
- Simple water pipe hook located on foot end to prevent slipping caused by water
- The anti-dust, uniform, and mute stainless steel brake casters allow easy operation, movement, and reliable performance.
